TRUCK UNLOADING UNIT

MADE BY HOLLAND HYDRAULICS

STANDARD EQUIPMENT FOR USE IN MANY INDUSTRIAL SECTORS

'FRUIT, WASTE, SCRAP, VEGETABLES, POTATOES, CEREALS, ETC, ETC'

UNLOADING: FAST, SIMPLE AND SAFE

SAVE TIME, SAVE MONEY

Over the last few years, Holland Hydraulics has been developing, producing and installing a number of Truck Unloading Units. These systems have been proving their stability, durability and productivity for fruit-growers in Costa Rica.

From 2012 onwards, Holland Hydraulics will be producing these systems as standard items of equipment for use in many industrial sectors: one standard unit for a capacity of 40 tons; and an optional unit which can be extended by 15 m in length.
